

Resin-XS

The #1 BLOOM BOOSTER for serious growers

- Resin-XS helps promote the weight and quality of flowers and fruit.
- Enhances resin and oil content.
- The ideal PK-additive for late bloom growth due to its combination of high PK and resin-enhancing-organics.
- Resin-XS is PGR free.
- Resin-XS will NOT induce foul residues or odors in the reservoir, nor cause blockages to drippers and filters.
- Dosage: 2 ml/L (7.5 ml/Gal) from week-4 bloom up until harvest.
- Available in: 1L // 5L // 20L // 200L // 1000L

Revolutionary Organic Compounds

Over half of the FloraMax additives contain organics, but as analytical chemists, we have been able to isolate specific 'beneficial' organic molecules and incorporate them into our additives in a direct, purified, and potent form. This enables their concentrations to be optimized for maximum nutrient effect with no negative side-effects. The result is a range of products that produce unique and tangible results without reservoir foaming, build-ups, odors or blockages.

Impact upon trichome size: Without Resin-XS (left) & with Resin-XS (right)

TESTIMONIES

“

“When the trichomes pushed out there was easily a third more than normal”.

“What I really enjoy about using your line though is that the buds do not have a PGR look to them and they look natural almost organic in their structure. Secondly the bud sites are huge and filled with resin! (USA Commercial consultant)”
