

Root-XS

Root-XS promotes explosive root growth. This helps accelerate plant growth and achieve faster crop rotation.

- **Minimizes transplant stress and helps guarantee rapid and 'stable' plant growth through all stages of development.** Plants can generally be pushed harder enabling faster crop rotation.
- **Produces greener, healthier foliage and fruits with less signs of stress.**
- **Root-XS will NOT induce foul residues or odors in the reservoir, nor cause blockages to drippers and filters.** The unique ingredients used in Root-XS are extremely stable thereby resulting in greater reliability and consistency for growers.
- **Suitable as both a root feed and foliar spray.**
- Dosage: 2ml/L (7.5 ml/Gal) in seed, veg and week 1-3 of bloom.
- Available in: 1L // 5L // 20L // 200L // 1000L

Revolutionary Organic Compounds

Over half of the FloraMax additives contain organics, but as analytical chemists, we have been able to isolate specific 'beneficial' organic molecules and incorporate them into our additives in a direct, purified, and potent form. This enables their concentrations to be optimized for maximum nutrient effect with no negative side-effects. The result is a range of products that produce unique and tangible results without reservoir foaming, build-ups, odors or blockages.

Root development over 8 days

TESTIMONIES

“Root-XS is the best root enhancer on the market now” (One of USA's largest chains)
“Daily there is clear growth and at this rate I'm at least 3 or 4 days ahead of my normal program. Root-XS has replaced at least three products that I normally use in wk 1 and the results for consistency and growth have been excellent.”
