

Resin-XS

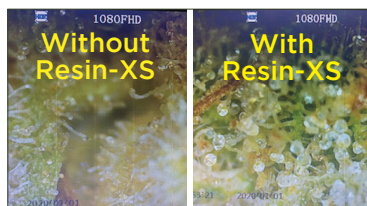

The #1 BLOOM BOOSTER for serious growers

- **Resin-XS helps improve fruit quality and development:** Increases frosting, resin, potency, swell, density and final mass.
- **Resin-XS is PGR free.**
- **Resin-XS will NOT induce foul residues or odors in the reservoir, nor cause blockages to drippers and filters.**
- **PK-additive component is ideal for use with any nutrient regime** as it is "pH-neutral" and carefully balanced for universal application. Resin-XS is designed to replace PK additives and all bloom boosters.
- Dosage: 2-4 ml/L (7.5-15 ml/Gal) from week-4 bloom up until harvest.
- Available in: 1L // 5L // 20L // 1000L

CAUTION: Organic additive – NEVER use in conjunction with chlorines or peroxides.

"Purified extracted organics" explained

The chemists at FloraMax have been able to deconstruct popular organic ingredients such as kelp, fulvic acid and guano then isolate specific 'beneficial' organic molecules. These are then incorporated into our additives in a purified and potent form. Importantly, this enables their concentrations to be optimized for maximum nutrient effect, with no negative side-effects. The result is a range of products that produce unique and tangible results without causing blocked drippers, pH fluctuation, build-up, foaming or odors.

FloraMax Resin-XS has an extraordinary impact upon trichome size.

TESTIMONIALS

“

"When the trichomes pushed out there was easily a third more than normal".

"What I really enjoy about using your line though is that the buds do not have a PGR look to them and they look natural almost organic in their structure. Secondly the bud sites are huge and filled with resin! (USA Commercial consultant)"
